The major objectives of Design Technology 1109 are as follows:

1. to develop knowledge of the scope and purpose of planning and design
2. to develop student ability in implementing the design process through problem solving
3. to develop student ability in reading and producing technical drawings
4. to develop student knowledge of design tools and their ability to use them
5. to develop student knowledge and performance in graphic techniques to produce a drawing
6. to provide students with an understanding of career opportunities and work requirements related to design technologies

NOTE: Design Technology 1109 is a prerequisite for Design Technology 2109
